Transforming Defence

INTERCEPTOR BOATS / SPEED CRAFTS

Our High-speed interceptor board is designed to meet the stringent requirements of defense and law enforcement agencies. These includes round-the-clock coastal patrolling, surveillance, high-speed interception and search-and rescue operations.

Operating with twin water jet systems, this Fiber planning vessels has excellent maneuverability and acceleration. The boat can survive up to sea state 6.

The boat has a good sea-keeping quality and a high level of dynamic stability, even at high speeds. The Interceptor Boat's features ensure high operation availability and low system redundancy

KEY FEATURES

- * Lightweight, compact design enables shallow-water operations
- * Integrated bridge control operational ease
- * Hi-resolution electro-optical camera for day-night surveillance
- * 4.7 m rigid inflatable boat for quick SAR operations
- * X-band radar with ARPA tracking

COMPREHENSIVE DESIGN CAPABILITIES

Our design capabilities span the entire design lifecycle, including basic design, detailed design and production drawings. The boat is wholly-designed at our state-of-the-art design competence center which is equipped with the latest software and high-end graphic workstations, wired together on a stand-alone gigabit network for security and speed.

This is in line with global trends for the execution of complex projects before realization, in order to optimize layouts, resolve interferences and complete visualization.

The data and documents related to the project are captured at the design stage itself in the product lifecycle management software. This service as a single-point master reference Database for the entire project, including all drawings, documents, correspondence, inspections reports etc.

SPECIFICATIONS

- Length (overall) : 27.42 m
- Breadth (max.) : 6.62 m
- Draft (max.) : 1.41 m
- Deep displacement : Approx. 110T
- Max. Speed: 45 knots
- Range: 500 miles at 20 knots (With 25% reserve fuel balance)
- Endurance hours: 24 hours, logically sustain for 72 hours
- Capacity: 13 crew members and space for 10 Detains / passengers
