# SALOG PHARMACEUTICAL LOGISTICS

Ensuring Safe, Compliant & Timely Pharma Deliveries

# INTRODUCTION OF SALOG

SALOG is a trusted and dedicated logistics partner specializing in the pharmaceutical, biotechnology, and healthcare industries, offering end-to-end, technology-driven supply chain solutions that ensure temperature-sensitive and high-value shipments are managed with precision, regulatory compliance, and a deep understanding of Good Distribution Practices (GDP) to protect product integrity and enable seamless global delivery.

# SALOG CORE LOGISTICS SERVICES

SALOG offers comprehensive core services, including efficient logistics with import and export coordination, customs clearance, and vendor management; secure CGMP-compliant storage and handling with temperature-controlled environments; pharma-grade and advanced cold chain packaging solutions such as envirotainer; reliable domestic and international transportation via air, sea, and road with last-mile delivery to hospitals, pharmacies, and clinics; and full regulatory compliance through end-to-end documentation, ensuring safe, timely, and compliant pharmaceutical logistics services across global markets.

## ADVANCED SPECIALIZED SOLUTIONS FROM SALOG

SALOG delivers comprehensive specialized logistics solutions tailored for the pharmaceutical and healthcare sectors, featuring advanced cold chain logistics with continuous end-to-end temperature monitoring and real-time GPS tracking to guarantee the integrity and safety of temperature-sensitive products; expert clinical trial logistics that include reliable site supply management and streamlined reverse logistics for efficient handling of unused or expired materials; thorough customs and regulatory support to ensure seamless compliance with international trade laws and pharmaceutical regulations; and secure, license-based handling and transportation of controlled substances, utilizing stringent security protocols and validated processes to maintain full accountability and safety throughout the supply chain.

# GLOBAL PERSPECTIVE – OPTIMIZING YOUR ENTIRE LOGISTIC SERVICE

- End-to-end global logistics solutions tailored for the pharmaceutical and biotech sectors
- Seamless integration of sourcing, import/export, and last-mile delivery
- Multimodal transport options: air, sea, and road with real-time GPS tracking
- Advanced cold chain infrastructure ensuring temperature integrity across borders
- Full regulatory compliance with GDP, cGMP, and international standards
- Customs clearance and documentation support in key global markets
- Centralized visibility and control for consistent supply chain performance
- Customized logistics plans for clinical trials, vaccines, and specialty products

# SALOG COLD CHAIN SOLUTIONS:

## SAFEGUARDING TEMPERATURE-

## SENSITIVE PHARMACEUTICALS

SALOG specializes in cold chain management by providing end-to-end solutions for the safe handling, storage, and transportation of temperature-sensitive pharmaceutical and biotech products, supported by advanced infrastructure capable of maintaining refrigerated (2–8°C), frozen (-20°C), and ultra-low temperature conditions for critical items like vaccines and biologics; with dedicated cold storage facilities equipped with backup power, temperature alarms, and contingency planning, we ensure uninterrupted product safety from first-mile pickup to last-mile delivery, while maintaining full compliance with global regulatory standards to protect product efficacy and patient health across international markets.
